

# LOVE

Love encompasses a range of states, from the most simplest pleasure. An example of this range of meanings is that the love of a mother differs from the love for food. Most strong attraction and

strong and positive emotional and mental state, a sublime virtue or good habit, the deepest interpersonal affection, to the example of this range of meanings is that from the love of a spouse, which differs commonly, love refers to a feeling of a

From songs and poems to novels and movies, romantic love is one of the most enduring subjects for artworks through the ages. But what about the science?

OLEKSANDR SHKRIABIN

Historical, cultural and even evolutionary evidence suggests love existed during ancient times and across many parts of the world. Romantic love has been found to exist in 147 of 166 cultures looked at in one study.

The complexity of love has much to do with how people experience it differently and how it can change over time.
